

**ON THE HOSTILE ACTS OF THE SOUTH KOREAN  
AUTHORITIES AGAINST THE ASIAN AND  
AFRICAN COUNTRIES**

Ministry of Foreign Affairs  
Democratic People's Republic of Korea  
Pyongyang, May, 1967

(Translated from Korean text)

It is universally known that the Pak Jung Hi clique of South Korea join the U.S. imperialists in the aggressive war against the Vietnamese people.

This is now giving rise to the voices of natural resentment and denunciation among the broad segments of peoples as well as governments of Asia, Africa and other parts of the world.

Pak Jung Hi's dispatch of troops to South Vietnam is, indeed, not only one more indelible treacherous act against the Korean people but also an unpardonable challenge against the Vietnamese people and the entire peoples of Asia and Africa.

It is widely known to the world what is going on in South Vietnam now.

Today the Asian and African peoples standing on the common front of anti-imperialism and anti-colonialism regard it their lofty, fraternal obligation to oppose the aggressive war of the United States in South Vietnam and extend support and sympathy to the fighting South Vietnamese people.

However, the Pak Jung Hi regime of South Korea has offered numerous South Korean youth to the U.S. aggressors as cheap cannon fodder, pledging allegiance to them.

The Pak Jung Hi clique have already sent 50,000 South Korean puppet troops to the war against the Vietnamese people. But not satisfied with this, they are planning to dispatch another 50,000 young South Koreans there under the name of a "logistical support unit", "technical personnel" and so on.

The Pak Jung Hi gangs are not only mobilizing the puppet troops to oppose the Vietnamese people but also dispatch them even to the Cambodian frontier, constantly threatening the territorial integrity of Cambodia and its people who fight for the consolidation of national independence against U.S. imperialist aggression.

All this brings into a bolder relief the real nature of the Pak Jung Hi clique as the U.S. imperialists' lackeys opposed to the Asian and African peoples fighting for liberation and independence. By origin, the South Korean regime is nothing but a tool of U.S. colonial rule manufactured through the so-called, fraudulent, "U.N.-supervised" elections at the point of the U.S. imperialists' bayonet.

Therefore, the South Korean regime, throughout its history from the days of Syngman Rhee to the days of Pak Jung Hi, has consistently been bent on opposing the national liberation movement of the Asian and African peoples and harassing peace, acting as a vassal of imperialism and colonialism.

This is clearly evidenced by the following few facts.

When Britain, France and Israel invaded Egypt in 1956, the Government and people of the Democratic People's Republic of Korea and all other peace-loving people of the world extended support and encouragement to the Egyptian people.

The South Korean puppet regime, however, impudently blared that it would dispatch volunteers to oppose the Egyptian people in support of the imperialist aggressors.

At that time, there existed no relations between the Egyptian and South Korean authorities. Yet, the South Korean authorities acted so, precisely because they are faithful servitors of imperialism.

Also at the time when the rebels staged a counter-revolutionary revolt in Indonesia in 1958 at the instigation of the imperialists, the South Korean puppet regime launched an extensive campaign for dispatching volunteers to support the rebels in opposition to the Indonesian Government and people. Describing it as a "menace" to the security of Southeast Asia that the Indonesian Government and people were opposing imperialism and colonialism and defending national independence, the South Korean authorities raved that "any country adopting a policy of non-interference toward Indonesia will bring self-destruction".

When the U.S.-British imperialists landed in Lebanon and Jordan in 1958 with the outbreak of revolution in Iraq as an occasion, the South Korean authorities were also the first to come out in active support of this act of aggression and intervention.

The South Korean authorities not only actively subscribed to each aggressive act of the imperialists against the national liberation movement of the Asian and African peoples but openly labelled as "hostile countries" all new-born independent states of Asia and Africa which proclaimed a policy of non-alignment and neutrality, shaking off the colonial rule.

The U.S. Government resorted to such methods to bar, even by whipping together such puppets as Syngman Rhee, the advance of the new-born independent countries of Asia and Africa which embarked upon erecting a new life.

But it proved futile. The indiscreet acts of the South Korean authorities invited only the burning indignation of the Asian and African peoples.

After the Syngman Rhee regime was toppled by the heroic uprising of the South Korean people, the United States induced its lackeys to alter their methods.

In order to hoodwink public opinion, the United States let Pak Jung

Hi, whom it had newly installed in the South Korean puppet regime, advocate "friendship" and "rapprochement" with the new-born independent countries in Asia and Africa.

But, the true color as imperialist stooge, no matter how it is disguised, can never be changed.

The signboard of "friendship" and "rapprochement" put up by the Pak Jung Hi regime is designed to worm itself into the big family of the Asian and African peoples and undermine the struggle for liberation and the consolidation of independence, as dictated by U.S. imperialism. In actuality, they are persisting overtly and covertly in all sorts of subversive activities against the common interests of the Asian and African peoples.

It is too well known a fact that in the past the Tshombe clique of the Congo (K) were the inveterate enemy of the entire African people.

But the Pak Jung Hi regime, in disregard of the unanimous will of the African people, dispatched friendship missions to the Tshombe clique and the Republic of South Africa and struck up close friendly relations with them, rendering active support and co-operation to the Tshombe clique.

Also when the U.S., Belgian and British imperialists launched the barbarous armed intervention against the Stanleyville region of the Congo (K) in November 1964, the Pak Jung Hi outfit unhesitatingly praised it as a "humanitarian step". The Pak Jung Hi outfit congratulated Tshombe and slandered as "black barbarism" the struggle of the Congolese patriots for freedom and liberation.

Such act of Pak Jung Hi outfit aliding with Tshombe was an intolerable insult to the liberation struggle of the entire African people.

Today in the Arab world, Israel has become the truculent enemy of the entire Arab people as a tool of imperialist aggression.

With this very Israel the Pak Jung Hi regime exchanged ambassadors and is developing friendly relations and exchanging even military delegations. In conspiracy with Israel it is engaged in all sorts of machinations against the interests of the entire Arab people.

Besides, the Pak Jung Hi gangs have established friendly relations with such racists as the Vorster clique of the Republic of South Africa and the Smith clique of Southern Rhodesia whom the entire African people oppose and hate, and frequently exchange delegations with them.

They have even sent South Korean puppet "military instructors" to the Smith clique.

Today the Arab peoples are raising high the banner of unity and solidarity in resistance to the aggression of the Israeli reactionaries and the imperialists.

But, the Pak Jung Hiites are scheming to undermine this unity and solidarity of the Arab nations, slandering their struggle as a "dark tragedy as the Arab world is now taking the contradictory roads of unity and division at the same time."

As goes the Korean saying: "thread follows needle", the Pak Jung Hi outfit are following in the footsteps of imperialism everywhere it is committing crimes.

Today the Pak Jung Hi clique, through the propaganda media at their disposal, are ceaselessly throwing mud at the liberation struggle of the Asian and African peoples, the home and foreign policies of their countries, their strivings for the building of independent economy and even at their traditional customs of life.

For instance, when Cambodia intrepidly spurned the U.S. imperialists' aggressive "aid", the Pak Jung Hi clique threateningly said that Cambodia would cease to exist the very instant the United States really took its hands off that country, saying that "Cambodia is comparatively a small, underdeveloped country and, therefore, it needs others' aid"

However, after rejecting U.S. "aid," economic and financial situation of Cambodia has taken a turn for the better. The Pak Jung Hi clique were duly punished in the long run by the Government and people of Cambodia for its slanders and calumnies against the Cambodian people.

The Cambodian Government expelled the South Korean puppet consulate-general from Cambodia in December 1966.

The Pak Jung Hi clique vilified the Burmese people as a "nation incapable of self-government." Pak Jung Hi and company are slandering that "the U.A.R. is the source of Arab upheaval," with a view to justifying the aggressive manoeuvres of imperialism, the root cause of troubles in the Arab world today.

The Pak Jung Hi outfit lauded sky-high the imperialist colonial rule over Nigeria, and in the case of Kenya, too, they ranted that only the continued British colonial rule would bring economic development and political stability.

The Pak Jung Hi clique slandered Islamism widespread in Asia and Africa, saying that it is "a creed of the beggars who are wont to fast with the sunrise".

Such instances are innumerable.

What is worse, the Pak Jung Hi clique slandered and calumniated heads of government of the Asian and African nations who are fighting against imperialism and colonialism and for the safeguarding of national independence as well as social progress, attaching various labels to them.

And all this is by no means accidental.

As for Pak Jung Hi, he was a faithful running dog of Japanese imperialism, who actively served as an officer of the Japanese army in the foreign aggression of Japanese militarism, betraying his own nation.

No sooner had U.S. imperialism landed in South Korea after the surrender of Japanese imperialism than Pak Jung Hi changed his master and became an agent of U.S. imperialism.

As an officer of a U.S. intelligence organ, Pak Jung Hi informed against numerous patriotic officers and men in the South Korean army to slaughter them; and has been perpetrating all sorts of treacherous acts up to this date.

The Pak Jung Hi regime's dispatch of troops to South Vietnam today is a typical expression of this.

They are boasting of the fact that the troop dispatch to South Vietnam was directly ordered by U.S. President Johnson, and are shamelessly talking about getting more "aid" from the United States as a price for the troop dispatch. This shows that they are trading in the blood by selling off fellow countrymen as cannon fodder of the aggressors across the ocean, as a shock-brigade in the fight against the Asian and African peoples.

Pak Jung Hi is prepared to commit any crime without hesitation when ordered or instructed by U.S. imperialism.

In order to patch up its crumbling colonial system in Asia, the United States is now ever more undisguisedly seeking to whip together South Korea, Taiwan, South Vietnam, Thailand, Malaysia, the Philippines and the like into a single military bloc with the revived Japanese militarist forces as its core.

As a link in the chain of such intrigue, the Pak Jung Hi clique have, at the instigation of the U.S. government, brought the "South Korea-Japan talks" into "conclusion" with the Japanese militarists, their old master, and are aligned with them politically, economically and militarily.

The Pak Jung Hi gangs are taking the lead in the U.S. imperialist manoeuvres to form aggressive military blocs in Asia and undermine Afro-Asian unity.

Facts show that the Pak Jung Hi clique are running wilder with each passing day as a dagger in the hands of U.S. imperialism pointed at the Asian and African peoples. Today, with a view to making more effective use of the Pak Jung Hi clique in carrying out their policy of aggression, the U.S. imperialists are actively putting up the South Korean puppet regime, describing as if it were a sort of independent "state".

U.S. imperialism advertises the South Korean puppets as an "example" in carrying out its policy of aggression and urges other subordinate countries to follow their pattern.

Whenever the U.S. imperialists find it hard to commit some crimes for themselves or to say something with their own mouth, they let the Pak Jung Hi clique act for them; and they also make the Pak Jung Hiites take the lead and work actively in ganging up their puppets and subordinate countries in Asia and Africa.

The Pak Jung Hi clique are a heinous hangman, malignant culprit, who stand proxy for U.S. imperialism in executing its policy of aggression and suppressing the national-liberation movement.

The Government of the Democratic People's Republic of Korea strongly condemns, in the name of the entire Korean people, all the above-mentioned crimes perpetrated by the Pak Jung Hi regime.

The Governments and peoples of all the Asian and African countries must unite and sharpen vigilance against the Pak Jung Hi clique who, as the running dogs of U.S. imperialism, are machinating to undermine the national-liberation movement of the Asian and African peoples, isolate the Pak Jung Hi clique more thoroughly and further intensify the common struggle to thwart the aggressive manoeuvres of the imperialists and old and new colonialists.
